Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office action is in response to the communication received September 13, 2005.

Claims 1-4 are pending in the application.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baillargeon et al (US20020046076A1). In view of Rothrock (US 5,729,687).

As per claims 1-2, Baillargeon et al disclose a multi-nodal meeting planning system. In so Doing, Baillargeon et al disclose a first node which is a secure computer protected from unauthorized access having a meeting planner application program for entering meeting planning data which includes personal, identifying, or other sensitive data of persons authorized as attendees at a meeting event, and non-sensitive group data which are unique to a group of authorized attendees at the meeting event and usable for meeting planning and other meeting facilitation functions for the group [Page 1, Paragraph 0013-0020 and Page 4 Paragraph 0055-0058], a second node which is a public online site which receives only the non-sensitive group data uploaded from the first node and assembles meeting planning and other meeting facilitation functions in a unique meeting group program using the non-sensitive group data Page 9

Art Unit: 3623

[Paragraphs 0183-0186; [Page 10 Paragraphs 0189-0192], a third node which is a private online site which receives the assembled meeting group program downloaded from the second public node and the sensitive data of authorized attendees downloaded from the first secure node and combines the authorized attendee data together with the meeting group program to create [Page 10 Paragraphs 0189-0192] Baillargeon et al do not expressly disclose private meeting group site accessible only to authorized attendees of the meeting event. Rothrock in the same field of endeavor, discloses the concept of collecting private meeting information from participants (col. 8, lines 13-35). It would have been obvious to a person of ordinary skill in the art to modify the teachings of Baillargeon et al to include the teachings of Rothrock with the motivation for joining participants into an ongoing meeting.

As per claim 3, claim 3 recites an online meeting planning method for performing the steps of system claim 1; therefore claim 3 is rejected under the same analysis relied upon of claim 1.
